

PRINCE NANDLAL PRAJAPATI

Full Stack Developer | MERN Stack Developer

Mumbai, Maharashtra, India | +91 9653351765 | pp2358296@gmail.com GitHub: <https://www.github.com/p-prince-n> |

Portfolio: <https://p-prince-n-portfolio.vercel.app> | LinkedIn: <https://www.linkedin.com/in/prince-prajapati-362806394/>

PROFESSIONAL SUMMARY

Full Stack Software Developer with hands-on experience in MERN Stack development, AI-powered multi-agent systems, microservices, and cloud-native architecture. Skilled in building scalable web applications, RESTful APIs, and production-ready AI platforms using React.js, Node.js, Express.js, MongoDB, MongoDB Atlas, Redis, AWS S3, LangGraph, and LangChain. Strong foundation in Core Java, SQL, Data Structures and Algorithms, Object-Oriented Programming, and System Design. Experienced in rate limiting, caching strategies, AI memory management, and containerized deployments with Docker. Passionate about delivering production-ready software and AI-driven solutions.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, SQL, Dart

Frontend: React.js, React 19, Next.js, Vite, Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, Bootstrap, Flowbite React, React Hook Form, Framer Motion, Recharts

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Socket.io, Rate Limiting, Multer, bcryptjs

AI & LLM: LangGraph, LangChain, OpenAI API, Google Gemini API, Google GenAI, Multi-Agent Systems, RAG, AI Memory Management, Prompt Engineering, AI Agents, AI Chatbots

Databases & Storage: MongoDB, MySQL, PostgreSQL, Redis, AWS S3, Cloudinary

Third-Party Integrations: Twilio (SMS), Nodemailer, Mailtrap, ExcelJS, QR Code Generation

DevOps & Tools: Docker, Docker Compose, Nginx, Git, GitHub, Postman, VS Code

Core Concepts: MERN Stack, Microservices, OOP, Data Structures and Algorithms, MVC Architecture, API Integration, System Design, Agile

PROFESSIONAL EXPERIENCE

ReactJS Intern

3 Months

UptoSkills

- Developed scalable MERN stack applications with responsive and user-friendly interfaces.
- Built reusable React.js components using Redux Toolkit, Tailwind CSS, React Hook Form, and Framer Motion.
- Integrated REST APIs for authentication, data management, and dynamic application workflows.
- Implemented responsive designs, interactive animations, and reusable UI components to enhance user experience.
- Collaborated using Git, GitHub, Agile methodologies, and API-driven development practices.
- Debugged and optimized frontend applications while maintaining clean, modular, and reusable code.

NeoAI – Multi-Agent AI Platform

React.js, Redux, Node.js, Express.js, MongoDB, MongoDB Atlas, Redis, AWS S3, Docker, Nginx, LangGraph, LangChain, OpenAI, Gemini, REST APIs, Microservices

- Developed a production-ready Multi-Agent AI Platform using the MERN stack with a microservices architecture.
- Built intelligent AI agents for Chat, Web Search, Code Generation, Image Generation, PowerPoint Generation, PDF Generation, and Document Processing.
- Implemented LangGraph for multi-agent orchestration and LangChain for AI workflow management.
- Designed persistent AI memory to maintain conversational context across multi-agent sessions.
- Integrated AWS S3 for scalable file and media storage, and MongoDB Atlas for cloud-hosted data management.
- Implemented API rate limiting to ensure system stability and prevent abuse under high load.
- Built Redux-managed state on the frontend for predictable, scalable UI behavior.

- Designed streaming AI responses for real-time user interaction and integrated Redis caching for improved performance.
- Containerized services using Docker and configured Nginx as a reverse proxy for production deployment.

ShopNova – Multi-Role E-Commerce Platform (College Project, 3rd Year)

React 19, Vite, Redux Toolkit, Zustand, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, Twilio, OpenAI API, Google GenAI

- Built a full-stack e-commerce platform with four role-based portals: Admin, Seller, Delivery Man, and User, each with dedicated dashboards and permissions.
- Developed an Admin dashboard with real-time analytics, revenue and order graphs, top-product tracking, and automated 20/80 admin-seller revenue split.
- Implemented full CRUD management for users, products, categories, sellers, and delivery personnel, including seller and delivery-man verification workflows.
- Built Excel report export (users, sellers, delivery men, products) using ExcelJS for admin data management.
- Implemented secure user authentication with JWT, OTP verification via Email and Phone, and password recovery flows.
- Built cart, wishlist, and product review systems, and a gamified Spin-to-Win discount feature with 24-hour redemption windows.
- Integrated real-time order tracking with SMS and Email notifications (Twilio, Nodemailer) for status updates across the order lifecycle.
- Built location and weather-based product recommendations, suggesting relevant items (e.g., clothing, food) based on user city and current weather.
- Integrated an AI-powered chatbot (OpenAI API and Google GenAI) for natural-language product search and recommendations.
- Added QR-code product sharing and social share functionality to boost product discoverability.
- Designed a fully responsive UI with Tailwind CSS and Flowbite React, optimized for desktop, tablet, and mobile.

TalkSpace & Chattrix

MERN Stack, Socket.io, JWT Authentication

- Built real-time chat applications using the MERN stack, Socket.io, JWT authentication, and MongoDB.

EDUCATION

Bachelor of Science – Computer Science

2023 – 2026

S.I.E.S College of Arts, Science & Commerce, Mumbai | CGPA: 8.83
